LaCie Data Bank

DESIGN BY F.A. PORSCHE

Our most compact portable hard drive

POCKET-SIZED ROADSTER

Our most compact hard disk ever, the LaCie Data Bank, Design by F.A. Porsche is the ideal traveller, driving up to 60GB at high speeds with USB 2.0. Weighing less than 4.5 ounces and measuring only 63mm wide, this jewel is barely larger than a credit card and it's thinner than a mobile phone. A masterpiece of understated elegance, the LaCie Data Bank comes in a sleek, ingot-shaped magnesium design.

UNMATCHED ADVANTAGES

Our 1.8" Data Bank is the perfect alternative to USB keys and Flash 1" devices because it's bus-powered, hot-plug and playable and no driver is needed, making it easy-to-use and convenient. In addition, it offers faster speeds and much greater capacities of up to 60000MB (60GB). Last but not least, compared to USB keys, the Data Bank is about 10 times more affordable per MB.

HIGH-SPEED DATA SHUTTLE

The LaCie Data Bank features Hi-Speed USB 2.0, which boasts lower power consumption and faster interface transfer rates of up to 480Mbits/s and data transfer rates of up to 21MB/s. These impressive speeds support efficient storage of digital audio, video, photos and office data, as well as easy sharing and exchanging information with others.

TRUE STORAGE AND BACKUP

At 60GB, LaCie's Data Bank is powerful enough to back up most laptop computers or archive entire collections of MP3s, photos albums, hours of videos, etc... More than just a data-shuttle, it can serve as a companion for workstation backup, professionals on the road, or data backup at home.

- Up to 60000MB (60GB) storage that fits in your pocket
- Hi-Speed USB 2.0 for universal connectivity
- Thin, super-lightweight magnesium design
- Driver-free** & power supply-free* for true mobility
